DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-8, 12 drawn to seeking out information for a client utilizing animation or an agent, classified in class 705, subclass 14.
- II. Claims 9-11 drawn to sending coupons to a user, classified in class 705, subclass 14.

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In this case the inventive method of Group I has separate utility such as seeking out information for a client utilizing animation or an agent. However, the inventive method of Group II is for sending coupons to a user. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

A telephone call was made to Robert C. Colwell (Reg No. 27,431) on March 12, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
